➤ 产品描述(Description):

Application	Incorporation into RNA/miRNA by 3'-End Labeling with T4 RNA Ligase
General Description	pCp-biotin connects a biotin molecule to the 3' hydroxyl (-OH) group of the RNA/miRNA template via T4 RNA ligase. The biotin labeled RNA/miRNA probe obtained is suitable for hybridization experiments. Streptavidin binding with horseradish peroxidase (HRP), alkaline phosphatase (AP), or fluorescent dyes can be used to detect the biotin moiety. In addition, the biotin labeled RNA/miRNA probe can also be purified using streptavidin bound agarose/magnetic beads.
